

The approved Entry Conditions to Finland for travelers arriving from outside the EU and Schengen area as of 21st December 2021

1. As a permit to entry a proof of valid full vaccination against COVID-19 prior the arrival AND
2. In addition to a proof of valid full vaccination against COVID-19, the incoming travelers are required to present a negative covid-19 test results no older than 48 hours.

The Covid-19 test certificate must state the name and date of birth of the traveler, the date of the test, the diagnostic method used for testing (PCR or antigen), the time of sampling and a signature by the issuing laboratory, test facility or authority.

Adaptation guide: The Covid-19 test taken at home is valid when it is checked, approved and signed by a laboratory, test institute or authority.

The decision is based on section 16 g of the Infectious Diseases Act and the guidelines given by the Ministry of Social Affairs and Health on 20th of December 2021. In addition to these, the health authorities will conduct random checks that include testing at airports and borders.
